

## Edmond Electric Co. LTD.

Last Updated Saturday, 17 October 2009

Use no more gas to mow your lawn! We offer a reliable, cost effective, and environmentally friendly alternative to conventional gas ride mowers.

### About our Company

We are a new company, we became incorporated on Oct 17th 2003, over the last few years we have developed and tested this state of the art design, it will cut up to 2 acres of grass on a 50cent charge,

We have made design changes of a special model for a manufacturer in Europe,

We also are hoping to set-up factories to manufacturer electric tractors in Ontario, Canada, and the US and Europe

We have developed a patent pending special microprocessor controller for the kit: this acts as the brains for the tractor and incorporates the safety and other features of the tractor,

The electric tractor is a real pleasure to operate and you will appreciate the no worries starting in any weather with almost no maintenance features, your neighbours will also appreciate the lower noise levels of your electric tractor.

Sincerely,

Brian Edmond  
President  
Edmond Electric Co. Ltd  
Canada.
